

As a regulated entity, TigerWit Limited meets the following regulatory requirements relating to client funds:

Segregation of Funds

All client funds deposited with TigerWit are fully segregated from the company's own funds and are kept in separate bank accounts. This ensures that funds belonging to clients cannot be used for any other purpose. Our interim and annual financial reports are externally audited, ensuring that our operations are conducted to the highest possible standards.

Additional Measures We Take

TigerWit is partnered with several major banking institutions, with client funds kept in banks such as HSBC and CBA. Internal limits ensure a diversification of client funds among banks, while credit risk is regularly monitored. Client funds are only kept in jurisdictions where segregation of client funds is supported by the local legal framework.

TigerWit offers Negative Balance Protection guarantee to all clients as part of the Client Agreement, as long as it is not manipulated and is accepted in good faith. We are committed to a strict policy ensuring that clients may never lose more than their total deposits.

Risk Warning: CFDs are leveraged products and can result in the loss of all invested capital. Please consider our 'Risk Disclosure Notice'.
